

ROHITH DONTHULA

PURPLE-TEAM CYBERSECURITY ANALYST · DETECTION ENGINEERING · AI SECURITY

New York City, NY | (551) 325-9945 | donthula.rohith22@gmail.com | rohithdonthula.com | linkedin.com/in/rohith-donthula | github.com/Donthularohith

PROFESSIONAL SUMMARY

Purple-team cybersecurity analyst with 3+ years across healthcare, financial services, and MSSP environments. I emulate adversaries (Atomic Red Team, Caldera, MITRE ATT&CK) and harden the detections that stop them (Splunk, Sigma, CrowdStrike Falcon, Stellar Cyber Open XDR) in the same sprint — cutting MTTD ~30% at Cerner and passing PCI-DSS/GDPR audits at Capgemini with zero major findings. Currently expanding into AI security: LLM-assisted SOC workflow, and threat-modeling AI systems against OWASP LLM Top 10 and MITRE ATLAS. MS in Cybersecurity (Yeshiva University); CompTIA Security+, CySA+, PenTest+.

SKILLS

Purple Team / Offense: Adversary emulation (Atomic Red Team, Caldera), MITRE ATT&CK, penetration testing (Burp Suite, Metasploit, Nmap, Kali), phishing simulation (GoPhish)

Detection & Response: Splunk SPL, Sigma, ELK, Stellar Cyber Open XDR, CrowdStrike Falcon EDR, Snort/Suricata, threat hunting, IR playbooks (NIST 800-61), forensics (EnCase, FTK, Volatility)

AI Security: LLM-assisted triage & enrichment, OWASP LLM Top 10 threat modeling (prompt injection, agent tool-use), MITRE ATLAS mapping, ML-based anomaly detection

Vulnerability Management: Tenable.io, Nessus, OpenVAS, CVE/CVSS risk prioritization, remediation coordination

Cloud & Infrastructure: Zero Trust (ZTNA), NGFW (Palo Alto), IBM QRadar, IAM/RBAC/MFA, DLP (Forcepoint), email security (Proofpoint)

Compliance: HIPAA, PCI-DSS, GDPR, SOC 2, NIST · **Scripting:** Python, PowerShell, Bash

PROFESSIONAL EXPERIENCE

Security Operations Center Analyst

Apr 2026 – Present

Security Validation (SecVal MSSP) — New Jersey, US

- Monitor and triage security events across multi-client environments with Stellar Cyber Open XDR and SIEM, responding to threats in real time.
- Detect, investigate, and contain endpoint threats with CrowdStrike Falcon; correlate IOCs and TTPs against MITRE ATT&CK during alert investigation and incident response.
- Support PCI DSS compliance monitoring for hospitality clients, keeping cardholder data environments aligned with regulatory standards.
- Tune detection rules and SIEM use cases to cut false positives and raise signal fidelity; run vulnerability assessments and deliver actionable remediation guidance.

Cyber Security Analyst — Purple Team

Jun 2025 – Mar 2026

Cerner Healthcare — United States

- Ran purple-team operations across Cerner EHR environments — emulated adversary TTPs and hardened detections in the same sprint, fully aligned with HIPAA.
- Improved MTTD ~30% by building automated detections tuned to healthcare-specific threats; centralized log aggregation across clinical apps, cloud, and IAM.
- Drove continuous vulnerability management with Tenable.io, prioritizing by CVSS and clinical risk; tuned email security and DLP to stop phishing/BEC and PHI exfiltration.

Cyber Security Engineer

Jun 2021 – Jul 2024

Capgemini — India

- Integrated SIEM with financial transaction logs and ATM switches; built correlation rules that accelerated detection of fraud and insider misuse.

- Segmented SWIFT and payment networks (NGFW, IDS/IPS, RBAC, MFA); designed PCI-DSS/GDPR data-protection controls — passed audits with zero major findings.
- Pentested online banking platforms (Burp Suite, OWASP) and remediated critical SQLi/XSS; improved forensic turnaround ~75% with EnCase and FTK.

SELECTED PROJECTS & RESEARCH

- **Zero Trust Electronic Voting System (ZTEV)** — research-grant-funded prototype: ZTNA with per-request re-auth, AES-256 ballot envelopes, blockchain audit log, Snort-monitored traffic.
- **Penetration Testing & Threat Intel Capstone (Team Lead)** — red-team engagement mapped to MITRE ATT&CK; 40-page report, 12 critical findings, remediation playbook adopted by program.
- **PMRSS** — privacy-preserving searchable encryption over IoT medical records under HIPAA (team lead, 3 engineers).

EDUCATION

MS, Cybersecurity — Yeshiva University, Katz School	Aug 2024 – May 2026
Cybersecurity Program — IIIT Bangalore	2023 – 2024
B.Tech, Computer Science & Engineering — Malla Reddy Institute of Technology	2019 – 2023

CERTIFICATIONS & HONORS

CompTIA: PenTest+ (PT0-003) · CySA+ (CS0-003) · Security+ CE (SY0-701) · Stackable: CNSP, CNVP, CSAP

Google Cybersecurity Professional (Coursera)

Honors: 2nd place, ISACA × Yeshiva CTF · Research grant, Zero Trust E-Voting (ZTEV)
